Re: WC Dkt. No. 05-25, RM-10593

Dear Ms. Gillett:

Sprint Nextel Corporation (“Sprint”) submits this letter to request that the Commission modify the Second Protective Order¹ to include protections for additional categories of information. In particular, Sprint requests that the Commission amend Paragraph 6 to include data, information, documents, or portions of a document that contain highly detailed or granular customer or geographic information regarding any of the following:

- the rates or charges associated with channel terminations or transport facilities, and information from which, whether alone or in combination with other confidential or non-confidential information, such rates or charges could be inferred;
- the circuit identifiers, tariff or contract identifiers, or other information associating channel terminations or transport facilities with a particular tariff or contract;
- the CLLI codes for the end office nearest to channel terminations or transport facilities.

Sprint represents that it keeps these data confidential, that the data at issue are not available from public sources, and that the data would, if released to competitors, allow those competitors to gain a significant advantage in the marketplace. Accordingly, the data should be granted highly confidential protection.

Please do not hesitate to contact me if you have any questions or concerns about this request.

Respectfully submitted,

s/ Paul Margie
